Webinar EFCEM / EEPLIANT2

"What suppliers must do to comply with energy label and ecodesign regulations for professional refrigerated storage cabinets"

A free and authoritative webinar with Q&A, by EU market surveillance authority professionals working with EFCEM

Thursday 5 September 2019, 10:15 CEST / 09:15 BST for one hour, with Q&A

Suppliers of professional refrigerated storage cabinets have had to display energy labels since July 2016 but some new requirements come into force in July 2019. Authorities must enforce the regulations to protect the interests of reputable businesses - but suppliers are all busy and how can they be sure they are compliant themselves? Will your marketing material be fully compliant and ready for HOST 2019 in October?

It can be hard to get to grips with so many regulations, but EFCEM and EEPLIANT2 project can help and are running a **webinar on morning of Thursday 5 September 2019** that will explain in simple terms exactly what is required from supplier's technical and marketing teams regarding energy labelling and ecodesign requirements.

This free-of-charge webinar is delivered through joint working of several EU market surveillance authorities - so be assured that you are getting authoritative guidance on these questions below and more, via the EU EEPLIANT2 project, and EFCEM:

- What benefits do I have as a manufacturer/supplier from all those regulations?
- What will a market surveillance authority inspector ask of me as an importer? Or as a dealer?
- Do I need test reports for all cabinet models?
- How do the climate classes on energy labels and in testing work?
- What makes energy labels and the fiche so important? And how can I persuade my colleagues of that?
- What exactly has to be in a 'Declaration of Conformity'?
- Do I have to show labels at trade fairs such as HOST 2019?
- What has to be kept in a 'Technical Documentation File' that I must give to the authority when asked

We will also discuss overall lessons from recent lab testing of 30 professional cabinets and inspection of technical documentation of over 50 cabinets across Europe under the EEPLIANT2 project.

These and many other questions will be answered during the one hour long webinar with participant Q&A, starting at 10:15 CEST / 9.15 BST on Thursday 5 September 2019.

About EFCEM

The European Federation of Catering Equipment Manufacturers (EFCEM, <http://efcem.info>) represents manufacturers of commercial kitchen equipment and includes the key European National Associations and their 550 company members. The federation is active in the formulation of standards for the industry and through its meetings seeks to identify and act on issues of common interest.

About EEPLIANT2

EEPLIANT2 (<http://eepliant.eu>) is a project coordinated by PROSAFE and funded by the European Union under the Horizon 2020 framework. EEPLIANT2 started in September 2017 and will last for 30 months. It unites seventeen Market Surveillance Authorities (MSAs) and a national agency from fifteen EU Member States to coordinate their monitoring, verification, and enforcement actions to increase rates of compliance with ecodesign and energy label regulations regarding professional refrigerate storage cabinets, household refrigerators and standby power for ICT equipment.
